

Power steering

Truck
and Bus

Unlimited mileage
12-month warranty

Over 50 years of engineering excellence

Life is tough for a 40-ton HGV, international coach or city bus. That's why – every day – thousands of commercial vehicle operators trust products remanufactured by PSS.

Cost

A remanufactured product typically saves over 40% on the cost of the manufacturer's replacement part.

Availability

Many vehicles have long service lives but new parts are not always available or cost-effective. At PSS, we carry a huge range of stock and can also remanufacture and return customer units within 24 hours of receipt.

Quality

With our modern materials, techniques and equipment, we can remanufacture many products to outperform the original.

Recycling

There's a benefit to the environment too. PSS remanufacturing uses less energy, fewer materials and saves on waste.

Unlimited mileage 12-month warranty

Every PSS remanufactured part comes with an *unlimited* mileage 12-month warranty

Safety critical, quality first

As the market leader, we remanufacture products in the same professional and clean environment in which we manufacture new parts for leading military and off-highway vehicle manufacturers.

- Each unit is identified, cleaned and shot blasted
- Carefully dismantled; any worn, damaged or mandatory replaceable parts are discarded
- All components are measured against their original specifications and all tolerances checked
- Any parts that require rework are meticulously re-engineered to OE standards or better
- Unit is reassembled in a clean environment
- Each unit is individually tested to simulate vehicle operating conditions
- Unit is fully repainted, stamped with a traceable reference, and ready for service

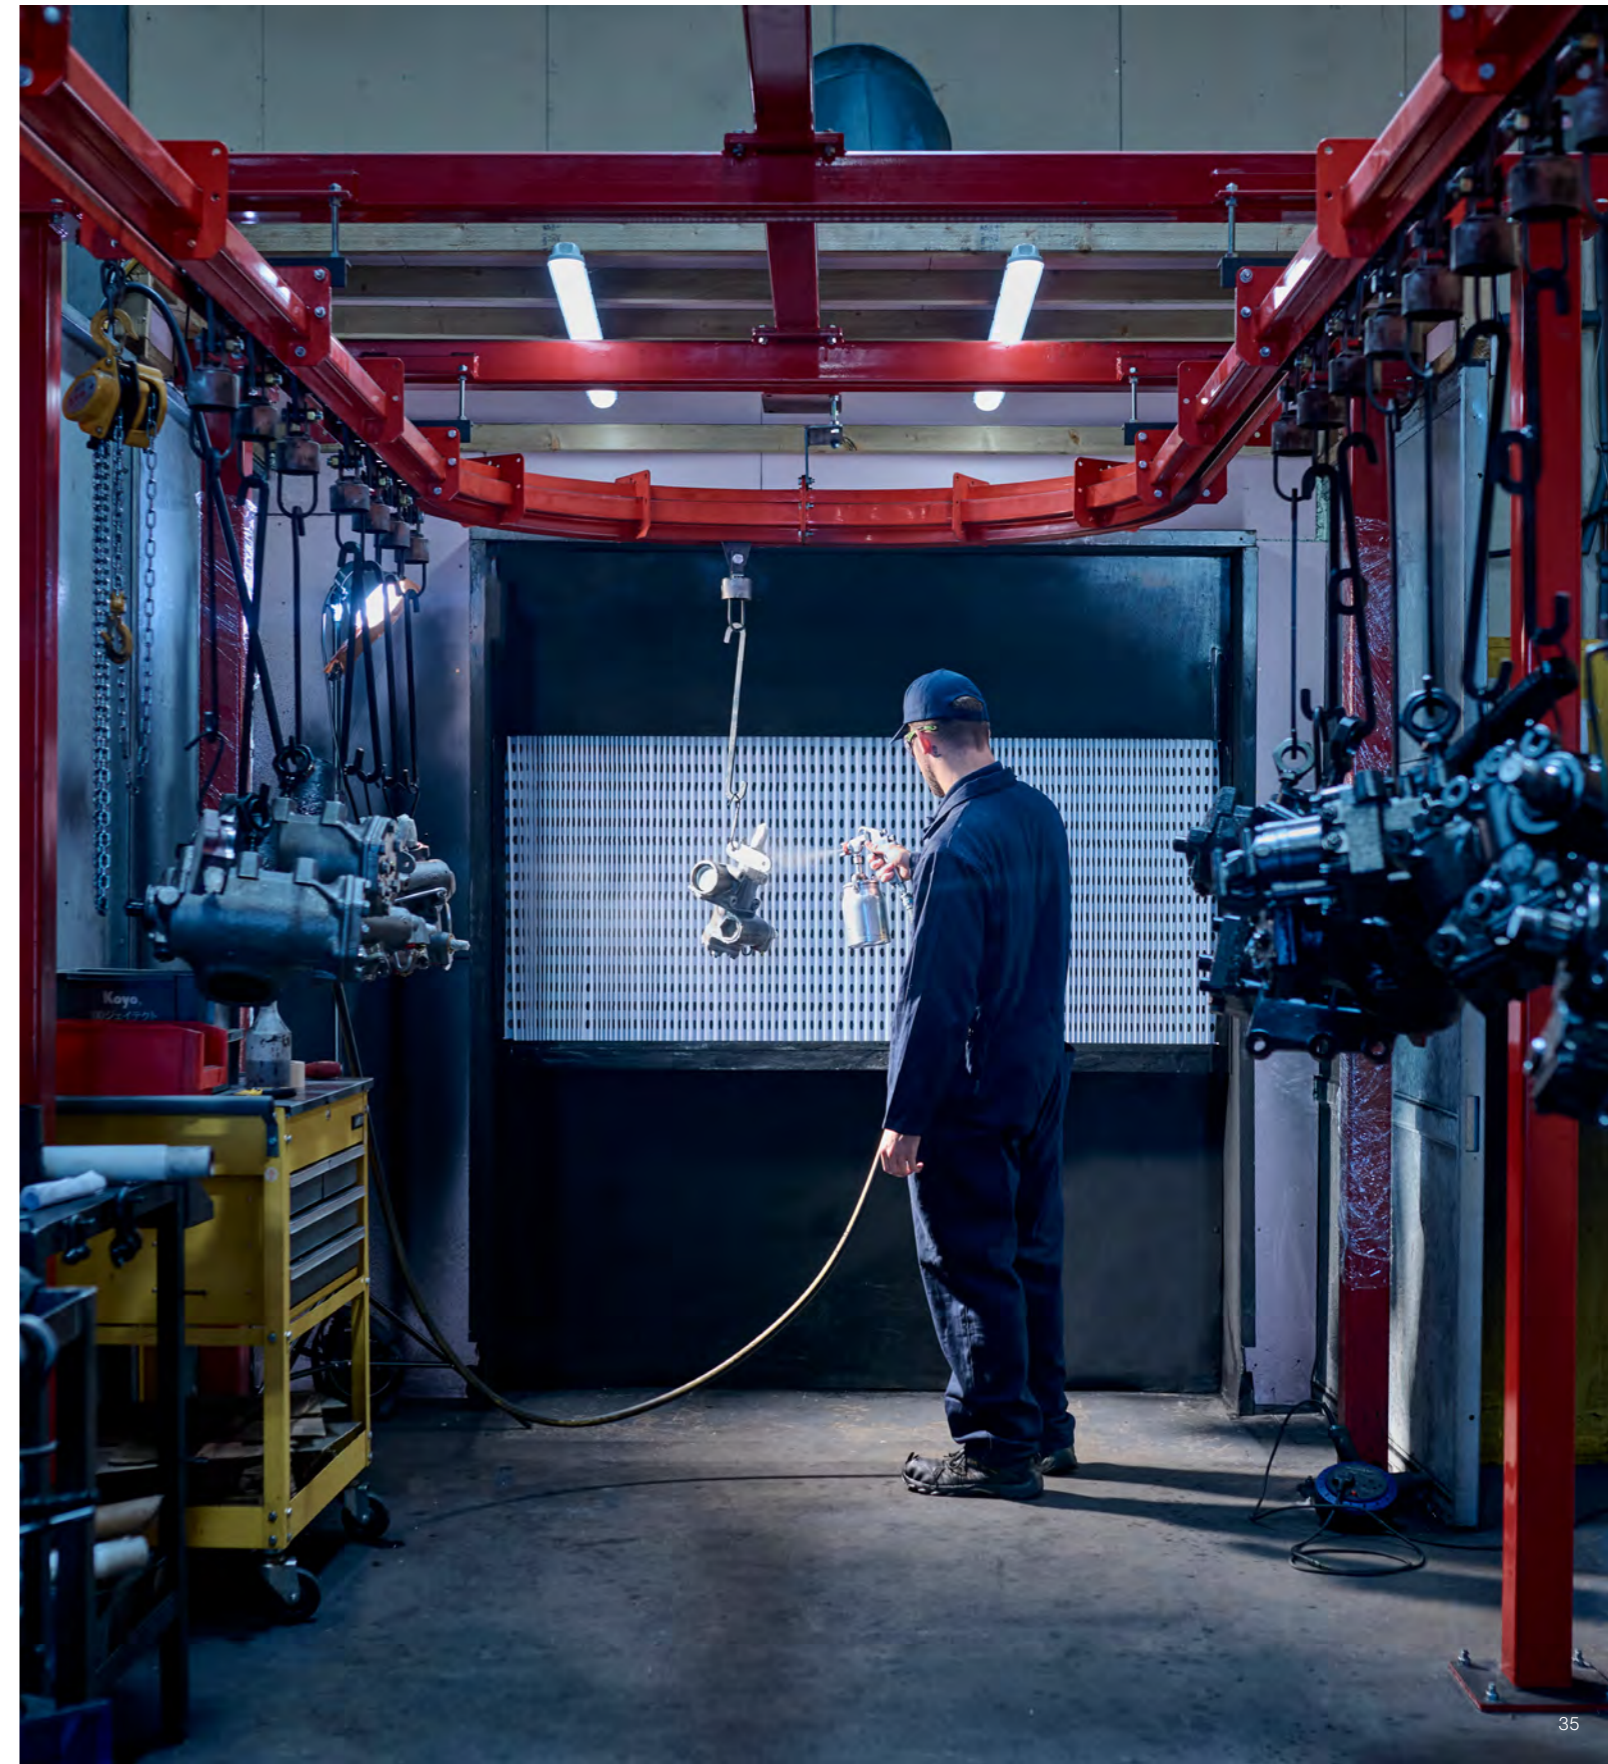

Steering box old core unit ready for remanufacture

All parts comprehensively refurbished or replaced in our factory

As good as new and ready for years of service
